AIT-VISTA

On-premise system for Assembly, Integration & Testing (AIT), tailored to your processes.

WHY IT MATTERS

Scale with confidence.

01 / ON-PREMISE

Runs at your site

Cameras and processing run offline at your facility. Your data stays with you, stored in a centralised repository.

02 / QUALITY

Objective verification

Each step is checked against the expected process and configuration, flagging deviations early to minimise project risks.

03 / TRACEABILITY

Single source of truth

A traceable history of how every unit was built and tested, linked with your documentation, ready for audits and event analysis.

04 / INTEGRATION

Fits your workflow

Works alongside your existing tools and processes, bringing the entire AIT process together with no additional workload.

PILOT FOR YOU

Build for what's next.

01 / TAILORED TO YOU

Built around your process

Configured for your AIT procedures and reference design, then deployed at your facility.

02 / VALIDATED TOGETHER

Checked with your team

Steps verified against your procedures, deviations confirmed by your engineers.

03 / BUILT TO LAST

Beyond the pilot

All outputs of the pilot stay with you, ready to support the optimisation of future campaigns.

BUILDING SPACE SYSTEMS? LET'S TALK.

We keep quality in check, processes on track, and paperwork out of the way, **so you can focus on scaling your products.**
